

# AspiComfort

POULTRY SEMEN COLLECTOR

It's all a matter of  
comfort!

Ref : 028863

IMV TECHNOLOGIES. FOR LIFE.

# Health safety: a priority!

## Features

- Small - light - compact
- Automatic start of the suction cycle  
⇒ regularity of collection
- Harness adjustable to any type of body shape or usable off the body

## Advantages

- No more risk of semen in the mouth
- No more unpleasant odors
- A mask can now be worn during collection

Hiring made easier!

Committed to a CSR policy, IMV Technologies simplifies and improves its customers' working conditions.

## AspiComfort:

they were waiting for it and immediately adopted it!

Loïc Viaud (turkey farm in dep. 49)

**“The AspiComfort is easy to use.** During collection, I hook it to the railing using the fastenings on the product. Collection itself is simple. The AspiComfort collection tube and vial are easy to hold in the hand. The timer setting of one minute is right for me. The AspiComfort is **a great help every day.**”

Emilie Peltier

(laying hens farms in dep. 72)

**“The AspiComfort is an excellent step forward, since the risk of swallowing semen and the revulsion of collecting from the roosters is a thing of the past.** When hiring, I'm often scared of people's reactions when demonstrating collection from the roosters with the traditional method (sucking with the mouth), but now with the AspiComfort, I have no more worries! For me, the suction method by mouth is a thing of the past.”

Héloïse Couasnard  
(laying hens farms in dep. 72)

**“With the IMV device, no risk of sucking semen into the mouth.** With the suction tube, odors such as droppings can often be detected and thanks to the device **you can keep your mask on and so reduce any unpleasant odors considerably!**”
