

IMAGo™ Flex

Designed to keep you on the go

imv TECHNOLOGIES

IMAGo™ Flex

Introducing the new generation of ImaGo Flex fertility and pregnancy scanners.

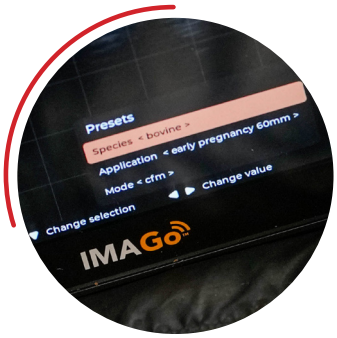

Offering unparallel accuracy and ease of use.

On the go reproduction focus

ImaGo Flex is tailored for for vets scanning different animals on the go. ImaGo Flex's rugged, portable design and good image quality ensures you're always ready for high-quality care, when working across multiple farms and to busy schedules thus reducing the time and cost up to 10%.

Quick start and seamless scanning process

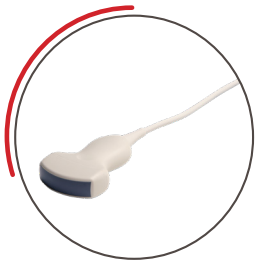

- Screen form factor and a choice of the pre-sets species-specific configurations ensures quick start process that only takes couple of minutes to start.

- Comfortable: chest mount in combination with lightweight (1.5 kg) allows to reduce strain during long days and speed the scanning process. No need to worry about recording the time on the farm, ImaGo Flex does it for you. It switches on when you start scanning automatically.

- Versatile probes: 7 different probes can be connected to ImaGo Flex to save you money. it can be used on cows, sheep, horses and pigs for different applications. Do more with one scanner and reduce the cost.

Convex probe

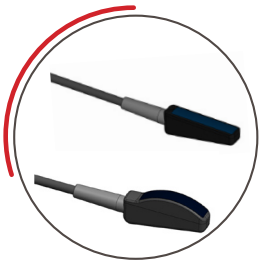

Backfat probes

IVF probes

Linear and Curve probes

imv TECHNOLOGIES

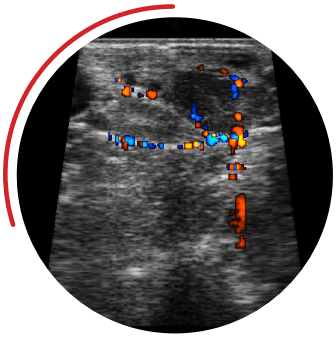

- Sound-Link technology ensures connection with mobile device and goggles to share or save the ultrasound image, train students or engage with your customers.

Built to keep you scanning

- ImaGo Flex's long-lasting, interchangeable battery provides up to four hours of continuous use and can be charged on-the-go in your car between farms due to the Smart-Beam technology.

Want to detect non-pregnancy earlier?

- With colour flow doppler mode ImaGo Flex helps detect non-pregnant cows earlier saving up to £3 per day per cow.

Efficiency you can rely on

- ImaGo Flex's simple interface and innovative features help you **get more done with less effort**. Speed up your workflow, reduce downtime, and stay flexible, no matter where your day takes you.

Testimonial

This is a very versatile device; we can scan small ruminants, sows, or cows. It offers excellent value for money.
