

### DID YOU KNOW?

"In our experiment conducted on 120 frozen-thawed straws, a significant higher motility and concentration were found in the last deposited drops."

Lucie Gavin-Plagne, Field Trials Engineer, IMV Technologies

### THEY TESTED IT!

"The Top Bull Sheath is really made for heifers. It makes the passage through the third and fourth cervical rings easier. The space between the end of the sheath and the end of the applicator is almost nonexistent which gives the technician more accuracy handling an insemination through a small cervix. "

DVM PhD Decuadro-Hansen, Chile

"Even if the diameter reduction of Top Bull Sheath seems non-significant, it is clearly palpable when you go through the cervix. The reduced diameter and the very specific tip shape permits easy passage through the usually «difficult» cervix of a heifer. The TBS applicator for mini straws only ensures a secure fit."

Dr. Joly, bovine AI consultant, France

# Top Bull SHEATH & APPLICATOR

Experience precision in insemination

APPALCOS&R - Version 1 - Janvier 2020

# Experience precision in insemination

Introducing the Top Bull Sheath, the sheath for insemination experts who want to be even more efficient in their work.

This thinner sheath with a special shape in its tip, when used with the dedicated TBS applicator, is the indispensable tool to complete your insemination box.

With the TBS sheath and applicator:

- easily manage «difficult-to-breed» cows
- improve semen use
- support environmental sustainability

Use it and be more efficient!

## Optimal semen use

Deposit 5% more diluted semen with the Top Bull Sheath! TBS is designed for mini straws only so its insert creates a perfect seal and will see reduced amount of backflow. In addition, the specific tip shape reduces dead-volume from 15µL, with a standard sheath, to 5µL with the TBS.

## Dedicated applicator

This TBS applicator is only used with mini straws and was specifically developed for the Top Bull Sheath. A perfect fit between the applicator, the mini straw and the sheath results in the best insemination experience.

Mini straw

## Easier heifer insemination

It becomes definitively easier to go through a heifer's small cervix thanks to the 10% reduction in diameter and special tip shape of the Top Bull Sheath.

Perfect fit between sheath, straw & applicator

## An eco-designed product

- cornstarch-based packaging
- 130g less plastic per 1000 sheaths
