High fertilization rate

COMPLETE SOLUTION TO OPTIMIZE
FISH FERTILITY

Ref: 018500
(10x concentrated) 1 liter bottle

StorFish

- Maturation of gonad milt
- Milt conservation to 2-4 days at 4°C
- Milt dilution for large volume of ovocytes
- Salmonids, marine fish, freshwater fish

FreezeFish

- Protein-free media for frozen milt
- Up to 90% fertilization after thawing
- Adapted to all species
- Provided with protocol and support

Ref: 026520
(Kit of 3 bottles)

High fertilization rate

COMPLETE SOLUTION TO OPTIMIZE FISH FERTILITY

Ref: 018499

(10x concentrated) 1 liter bottle

OvaFish

- Cleans the ovocytes (mucus, blood, faeces)
- Antibiotic-free
- Conservation of ovocytes during transport
- Limits the outbreaks of vertically transmitted diseases (IPN, IHN, Flavo)
- Limits fungus during incubation
- Salmonids, marine fish and freshwater fish

ActiFish

- Activation of fertilization
- Improves fertilization rate with:
 - low quality milt
 - cryopreserved milt
- Salmonids, marine fish, freshwater fish

Ref: 018274

(10x concentrated) 1 liter bottle
